

MEKA MANU

# Korarā

(Little penguin)

*Eudyptula minor*

Sparklers

MEKA MANU

## Characteristics

Kororā are a special little manu. They are the world's tiniest penguin, only found here in Aotearoa.

The little penguin was once common on the main islands, but now most are on our smaller islands, with less disturbance!

Kororā like to stay at home in underground burrows, under vegetation or in caves. You'd be very lucky to see one!

MEKA MANU

Are you hearty and resilient? Do you  
love climbing over rocks and  
hanging at the beach?

**That sounds like a kororā.**

MEKA MANU

What can we learn from  
kororā?

How might we apply this in  
our classroom?
