

MEKA MANU

Mōhua

(Yellowhead)

Mohoua ochrocephala

Sparklers

MEKA MANU

Characteristics

Mōhua are fast and chirpy.

You'll often find them nesting in tree holes. These manu are agile and have great coordination.

They'll hold onto the tree bark with one foot and, using their tail to keep balance, will scratch to get the bugs on the rākau with their other foot.

MEKA MANU

They love heading high up into trees, chirping as they go! You may see mōhua bouncing and scrambling up and down a rākau.

Do you love to chatter and always on the move? Are you steady and balanced in your movements?

**You might be
like mōhua!**

MEKA MANU

Fun fact!

Mōhua is the bird that features on the \$100 note!

MEKA MANU

**What can we learn
from mōhua?**

**How might we apply
this in our classroom?**
